

Course description

This course has proved to be very successful in not only lowering the amount of fuel used over a prolonged period and the environmental benefit, but also reducing the risk of incidents that drivers face day to day.

The day starts with a presentation to set the parameters for the day and to introduce the concept of fuel-efficient driving. At the end of the course each driver will have a better understanding of how to use different advanced driving techniques to reduce fuel consumption whilst improving safety and be better equipped to deal with the pressures of driving.

Drivers completing the course often see a reduction of 10% saving in fuel usage.

Digital assessment reports are accessible to employers post training and provide the detail of the training and a risk rating to help employers manage their ongoing risk removing the unknown.

Who is the course for?

Vehicle operators who would benefit from practical understanding of Eco Driving techniques to improve safety and improve their MPG Performance.

Key facts

Half Day – 1 Delegate
Full Day – 2 Delegates

1 colleague per session

Post course e-report emailed direct to manager

Any suitable UK location

Various certification options available
